HOW TO CREATE A CALM

Lighting is fundamental to shaping the atmosphere of any residential or commercial project. At Nordlux, we specialise in lighting solutions tailored to a wide range of applications.

Be inspired as you explore Nordlux lighting across workspaces, restaurants & cafés, hotels and residential settings - and discover how lighting shapes both mood and function.

Nordlux for projects

At Nordlux, we design lighting with real projects in mind. Rooted in Scandinavian design principles, our collections combine aesthetics with reliable performance and strong value for money.

Our solutions are developed to be both flexible and scalable - making it easy to create consistent lighting schemes across everything from small spaces to large-scale projects.

This catalogue is designed to support your planning process and inspire new possibilities across workspaces, hospitality environments and residential settings.

WORK SPACE

Workspace lighting

Lighting is a critical factor in workplace design, directly impacting visual comfort, concentration and performance. Achieving the right balance of light levels, colour temperature and light quality is essential to support different tasks throughout the day.

Higher colour temperatures, such as 4000K, are often preferred in work environments as they promote alertness and focus, while high colour rendering (CRI 90) ensures accurate colour perception.

Uniform light distribution and low glare levels are equally important to reduce eye strain and create a comfortable working environment.

"We loved how the fittings added to the design without overpowering it."

The style is so versatile, we'd absolutely use Nordlux again for future projects."

- Giuliano Rapoz and Zara Findlay, Owner of The Foxes Maltings

Meeting rooms

Lighting in meeting rooms needs to support a range of functions
- from focused discussions to presentations and video calls.

A balanced light level combined with a neutral colour temperature, typically around 3000-4000K, creates a comfortable environment for collaboration. High colour rendering (CRI 90) ensures natural skin tones and accurate colour perception, which is particularly important for longer meetings and video conferencing.

Many of our solutions are based on replaceable light sources, offering flexibility in both maintenance and light specification. Choosing lamps that shield the light source and minimise glare is essential to ensure visual comfort and avoid direct glare across the table.

Recommended for meeting rooms

Akeno *Design for The People*

Akeno brings a warm and refined atmosphere to meeting rooms. The dimmable light makes it easy to adjust the setting throughout the day, while the slim silhouette creates an elegant look without dominating the space.

Artist *Design for The People*

With its high light output and dimmable function, Artist is well suited for meeting rooms that require both focused working light and a softer atmosphere. The slim profile adds a clean and professional feel to the room.

Kaito *Design for The People*

Kaito combines directional lighting with a clean, contemporary expression. The adjustable lamp head makes it easy to highlight specific areas of the table, making Kaito a practical choice for presentations, collaboration and everyday meetings.

Recommended for desks

Artist *Design for The People*

Artist is ideal for desks where both comfort and performance matter. The high lumen output provides excellent task lighting, while the soft, diffused light creates a pleasant workspace. The tiltable lamp head allows you to direct the light exactly where needed.

Makoto *Design for The People*

Makoto is a great choice for desks thanks to its directional light and slim design. The adjustable lamp head makes it easy to adapt the lighting for focused tasks, while the brushed satin chrome finish adds a subtle and contemporary feel to the workspace.

Stay *Design for The People*

Stay is a practical choice for desks thanks to its highly flexible design. The adjustable arm and lamp head make it easy to direct the light exactly where needed, while the upward and downward light distribution creates a comfortable working environment throughout the day.

RESTAURANT

CAFÉ

Restaurant & café lighting

Lighting is essential in shaping the atmosphere and overall experience in restaurants and cafés. The right balance of light levels, colour temperature and light quality helps create inviting spaces that encourage guests to relax and stay longer.

Warmer colour temperatures, typically around 2700-3000K, are often preferred to create a soft and welcoming ambiance. High colour rendering (CRI 90) ensures that food and interior materials appear natural and appealing.

In narrower spaces and table settings with limited space, compact lamps are key. Lamps that minimise glare and deliver focused light onto the table help create an intimate setting while ensuring guests are not exposed to harsh brightness.

Layered lighting combining general, accent and decorative light further enhances depth and atmosphere.

Recommended for "on-table"

Arcello *Design for The People*

Arcello is ideal for on-table lighting thanks to its slim, space-saving design. The dimmable light makes it easy to create the right atmosphere throughout the evening, while the long battery life and high IP rating make Arcello suitable for both indoor and outdoor use.

Glossy *Design for The People*

Glossy Portable combines elegant materials with practical functionality for on-table lighting. The solid marble base ensures excellent stability, while the dimmable light creates the right atmosphere throughout the evening. On the lowest setting, Glossy Portable can light for up to 60 hours on a single charge.

Trezzi *Design for The People*

Inspired by the elegance of a cocktail glass, Trezzi adds a refined and decorative touch to the table setting. The fluted glass creates a soft ambience, while the three-step dimming makes it easy to adjust the mood throughout the evening. The battery can last up to 60 hours on the lowest setting.

Recommended for "above-table"

Hill *Design for The People*

Hill is ideal for above-table lighting thanks to the lightweight Tyvek material and enclosed light source that ensures a soft, glare-free light. The large shade spreads the light evenly across the table while maintaining an open feel in the room.

Latika *Design for The People*

The layered metal shades make Latika a great choice for above-table lighting where visual comfort is important. The soft, glare-free light creates a calm atmosphere around the table, while the concentrated downward light is ideal for dining and seating areas.

Navone *Design for The People*

Navone combines soft opal glass and elegant brass details in a timeless design suited for dining tables and seating areas. The opal shade creates a soft and comfortable light, while the organic silhouette adds a calm and atmospheric feel to the space.

HOSPITALITY

RESIDENTAL

Hospitality lighting

Lighting plays a defining role in shaping the overall guest experience across hospitality environments. From reception areas and corridors to restaurants and guest rooms, a consistent lighting concept is key to creating a cohesive and welcoming atmosphere.

Warm colour temperatures, typically around 2700-3000K, help establish a relaxed and comfortable ambiance, while high colour rendering (CRI 90) ensures materials and colours are presented accurately throughout the space - particularly in areas such as bathrooms, where good light quality is essential.

A well-considered combination of decorative, ambient and functional lighting supports both orientation and atmosphere. Consistency in design and light quality across different areas is essential - delivering the complete hotel feel from arrival to departure.

“Nordlux always delivers good quality and high value for money.

We received excellent support from our dedicated salesperson who did everything to go the extra mile for us.”

- Charlotte Kaae, Interior designer

Recommended for rooms

Louella *Nordlux*

Louella is well suited for hotel rooms where flexible and comfortable lighting is important. The adjustable lamp head makes it easy for guests to direct the light for reading or relaxing, while the integrated touch button allows for easy individual control directly on the lamp.

Makoto *Design for The People*

Makoto is a great choice for hotel rooms thanks to its directional light and compact design. The adjustable lamp head makes it easy for guests to direct the light for reading, working or relaxing without disturbing the atmosphere in the room.

MIB *Design for The People*

The slim and timeless design makes MIB a natural fit for modern hotel rooms. The adjustable lamp head provides precise reading light, while the integrated touch button allows guests to control the light directly on the lamp.

Recommended for restrooms

Cavara *Nordlux*

Cavara combines decorative design with practical bathroom lighting. The high IP44 rating makes it suitable for humid areas, while the choice between 3000K and 4000K and the high light quality (RA90) ensure comfortable and accurate lighting in different restroom environments.

Falkir *Nordlux*

Falkir is a practical choice for restrooms thanks to its high IP44 rating and easy installation. The integrated LED provides comfortable lighting for everyday use, while the extra lid allows installation both directly on the ceiling and on a hook outlet.

Virelle *Nordlux*

The ribbed diffuser gives Virelle a soft and decorative light expression that works especially well in restrooms. The high IP44 rating makes it suitable for humid areas, while the dimmable light and high light quality (RA90) ensure comfortable lighting throughout the day.

IP ratings and bathroom zones

When planning bathroom lighting for hospitality, residential or commercial projects, it is important to consider where each light fixture will be installed. Bathroom areas are divided into zones with specific IP rating requirements. The closer a light fixture is placed to a water source, the higher the level of protection against moisture and water is required.

Zone 0

The area inside the bathtub or shower tray.

Nordlux does not offer light fixtures suitable for this zone.

Zone 1

Areas exposed to direct water contact. Light fixtures installed in this zone must have a minimum rating of IP65.

Zone 2

The area surrounding bathtubs and showers. Light fixtures installed in this zone must have a minimum rating of IP44. IP65 is recommended for added protection.

Outside the zones (formerly Zone 3)

In all other bathroom areas, light fixtures with a minimum rating of IP20 can be used, provided they comply with local building regulations and the requirements of the project.

[READ MORE](#)

Recommended for hallways

Furiko *Nordlux*

Furiko is ideal for hallways where a soft and welcoming atmosphere is desired. The indirect light reflects beautifully onto the large shade, creating a calm lighting experience that works especially well in shared spaces and corridors.

Oja *Nordlux*

Oja is a practical choice for hallways thanks to its slim design and versatile lighting options. Depending on the model, Oja is available with features such as Moodmaker™, colour temperature adjustment and sensor functionality, making it easy to adapt the lighting to different hallway environments.

MIB *Design for The People*

The slim and elegant design makes MIB well suited for hallways and shared spaces. The directional light and adjustable lamp head make it easy to highlight specific areas, while several lamps can be combined to create a clean and uniform look along corridors.

Recommended for outdoor areas

Aludra *Nordlux*

Aludra combines sculptural design with durable outdoor functionality. The elegant light and shadow effect creates a welcoming atmosphere in outdoor areas, while the extra durable material and 10-year surface guarantee make Aludra especially suitable for coastal environments.

Sidara *Nordlux*

The perforated design gives Sidara a decorative and atmospheric light effect in outdoor areas. The minimalist expression works especially well along pathways and entrances, while the durable material and 10-year surface guarantee make Sidara suitable for coastal environments.

Venø *Nordlux*

Venø creates a soft and comfortable lighting pattern through the layered shades, making it especially suitable for pathways, entrances and shared outdoor areas. The durable copper material develops a beautiful patina over time and is designed to withstand harsh coastal weather conditions.

Design For Seaside

Nature is beautiful - but it can also be rough. Crashing waves, wind, salt and especially sand can be a challenge for your home and your outdoor lighting.

For Nordlux, this beautiful but harsh nature and weather is part of everyday life. We therefore strive to produce lamps created from natural materials which are also resistant and durable, year after year, in relentless weather and nature.

Nordlux offers a 15-year guarantee on all outdoor lamps in galvanized steel, corten, copper and brass. This guarantee applies to extensive corrosion in the form of holes in the metal caused by rust.

We are also proud to offer an extensive range of painted outdoor lighting in our unique "Designed for Seaside" coating, which has an unprecedented 10-year guarantee on surface deterioration.

The brass trend is increasing everywhere - also for lamps and complements the minimalistic Nordic design style in the most beautiful way. Cera is made of brass that adds warmth, cosiness and exclusivity to the bright interior design. The round shape of the lampshade creates nice visual volume to the slim frame.

Clyde 4-Spot Nordlux

Slim Nordic design meets innovative technology in the Clyde series. The built-in Moodmaker™ function lets you adjust the light in three steps from a regular wall switch. With its four light sources, Clyde is ideal for long dining or kitchen tables, offering plenty of light without blocking the view or taking up space. The Moodmaker™ function allows you to switch from bright, functional lighting to a warm and cosy atmosphere for dinners with family and friends.

Fuji, designed by Danish design studio Says Who, finds its perfect balance in the meeting between two classic materials. The soft, organic lines of the wooden top add a natural warmth to the sleek, industrial look of the metal shade. Fuji is ideal above the dining table and casts a pleasant, downward light.

Latika, designed by Danish design duo Says Who, is a modern interpretation of the classic shade-on-shade pendant. The slim metal shades with a brushed finish form a geometric silhouette, softening the light for a glare-free glow. The result is a minimalist design with high functionality - ideal for dining areas or rooms where you want a calm and concentrated light. The detachable bottom stem allows you to choose the final look.

The overall shape of the shade is soft and round, yet the very subtle curved bottom adds a new interesting dimension that transforms the lamp into more than just a sphere. The brass details add a contemporary touch, underlining the suspended lightness of the lamp.

Ray 2-Kit *Nordlux*

The Ray pendant 2-kit from Nordlux includes two lights in a very classic and stylish design. The lights are made of black lacquered metal. Use them as decorative lights in a corner that requires extra light, or as reading lights behind the good armchair. The lights can be hung together, separately, offset, or at the same height – there are many possibilities.

Kaito 2 Dim *Design for The People*

Kaito Dim by Danish designer Bønnelycke MDD is carried out in a round, modern design. The integrated LED module is dimmable and ensures a soft and diffused light from the uniform surface. The functional kip joint, made from brass, adds an elegant superiority to the design and the possibility of directing the light in any direction.

Alton 20 *Nordlux*

Use warm, golden tones to contrast the Nordic minimalism. The Alton series creates a beautiful unison between the simple opal white glass and the fine brushed brass details. The warm metals are still hot in decor, and the combined brass and glass give the series a graceful appearance and complement each other in the finest of manners.

Glossy Mini *Design for The People*

Glossy is the epitome of tasteful and sophisticated design. Danish designer Maria Berntsen has created a "mini version" of the classic table lamp that oozes Nordic minimalism, and where exclusive materials like marble, brass and opal white glass all contribute to an incredibly elegant design. Glossy takes its name from the shiny surface of the opal white glass, which lets a soft and pleasant light shine through.

Stay Long *Design for The People*

Stay is designed by Maria Berntsen and is a functional, yet timeless lighting design at the same time. The oblique cut of the shade creates an open and pointing shape that allows for lots of light to shine through.

The flexible head and the swivel mechanism of the arm makes it possible to direct the light and create optimal lighting conditions – just loosen the screw and adjust the arm to set the light you need.

Takai Marble *Design for The People*

The iconic Takai table lamp by Studio Mavro//Lefèvre by Sofie Lefèvre is inspired by architectural brutalism, which focuses on materials, textures and tactility. The solid, brown marble base has an intriguing shape that effortlessly carries the light fabric shade. Takai is a beautiful statement piece that invites you to look at it from many different angles. The combination of brown marble, flax linen and burnished brass creates a very soft and warm design language.

Cera Nordlux

The brushed steel finish gives Cera a modern and timeless look that perfectly complements the minimalist Nordic design style. The smooth, rounded shade adds visual balance to the slim frame, creating a harmonious and elegant look.

Cera provides a pleasant downward-facing light - ideal for placing next to your sofa or favourite reading chair.

With a cool and industrial design, the Darci series by Bjørn + Balle is both a highly functional and aesthetic addition to your home. Perfect next to your sofa, armchair or any other place in your home that needs a stylish and functional light. The beautifully curved lamp head is easily adjusted whether you need it for reading, working or just adding the right ambience to the room. High quality materials with a satin soft, matt surface radiate a modern and streamlined look.

Makoto is a sleek and minimalist floor lamp designed by Danish Nital Studio. The minimalist, vertical silhouette is finished in satin chrome – a warm, brushed chrome finish that adds a subtle softness to the industrial look. The two adjustable lamp heads provide flexible and directional light, making Makoto ideal for reading, working or highlighting selected areas.

Stay is designed by Maria Berntsen and is a functional, yet timeless lighting design. The shade's angled cut makes for an open and pointed shape that allows plenty of light to shine through.

The flexible head and the arm's swivel mechanism allows you to direct the light and create optimal lighting conditions – simply loosen the screw and adjust the arm to get the light you need.

Strap

Design for The People

Designers Bjørn + Balle have created Strap by combining metal and high-quality leather for a light, Nordic aesthetic. The elegant strap adds warmth, balancing a classic and industrial look. Strap comes with two leather straps – one brown and one black – allowing you to choose the final look.

Louella *Nordlux*

Louella stands out with its cool, chunky shape and satin-soft surface that feels both modern and elegant. The adjustable lamp head lets you direct the light exactly where you need it – ideal for reading or creating focused, functional lighting in your home.

The lamp is designed for individual control using the integrated touch button on the lamp itself, and not from a wall switch.

Stay is designed by Maria Berntsen and is a modern, yet timeless lighting design at the same time. The oblique cut of the shade creates an open and pointing shape that allows for lots of light to shine through. The Stay wall light emits a soft, comfortable light both upwards and downwards – creating the perfect light for your bedside or kitchen table.

Umberto *Nordlux*

Umberto is an elegant downlight that is very easy to install without any springs or brackets – making it ideal for even deep ceilings and various materials.

Umberto requires a regular GU10 bulb and can be adjusted for a directional light. The high IP rating (IP44) means it is also suitable for the bathroom.

Arki 35 *Nordlux*

The Arki series by Danish designer Bønnelycke MDD is characterised by its beautiful dome-like shade and minimalist, clean lines inspired by the classic architect lamp. The oversize shade adds a grandiose and spectacular quality to your house façade. Arki beautifully balances simplicity with sophistication while emitting the perfect light for your entrance, driveway, terrace or other outdoor space.

Canto 2 *Nordlux*

Whether Canto 2 is placed indoors or outdoors, the lamp offers a unique lighting experience. The minimalist design makes the lamp both decorative and sculptural. The light flows both up and down, and with the three included pattern inserts, it is possible to change the light image according to desire and personal style. Designed by Danish designer Bønnelycke MDD.

Fold 10 *Nordlux*

"Fold a sheet of paper, place a bulb behind - and you have a lamp." Although the reality is not that simple, designer Henrik Bønnelycke wants the light to appear as if it is. In terms of shape, Fold is brightly clear, where the selected details and latest LED technology are in focus. The magnetic shade makes the installation simple and the design distinct without visible screws. The light shines up and down, and the four included light patterns change the light based on desire and personal style and are also an element for light dimming.

Lønstrup 22 Sensor Nordlux

A classic wall light from Nordlux with sensor. The wall light is perfect for mounting in the driveway, at the entrance, on the terrace, or on the patio. The built-in sensor ensures that the light turns on automatically when it detects motion nearby. At the same time, it ensures that the light is not turned on unnecessarily.

Lønstrup 32 Sensor Nordlux

A classic wall light from Nordlux with sensor. The wall light is perfect for mounting in the driveway, at the entrance, on the terrace, or on the patio. The built-in sensor ensures that the light turns on automatically when it detects motion nearby. At the same time, it ensures that the light is not turned on unnecessarily.

Polperro *Nordlux*

Polperro was inspired by harsh coastal areas with roaring seas and tall waves. The maritime design makes Polperro a decorative and classic wall lamp that fits beautifully by the front door, the garage or on the fence. Furthermore, the Polperro can be connected in parallel, making the lamp extremely functional.

Sidara *Nordlux*

Designed by renowned Jacob Jensen Design, this Sidara wall light combines modern minimalism with a refined, architectural expression. The perforated surface creates a beautiful play of light and shadow in your outdoor areas.

We recommend a high-lumen bulb to achieve the intended light effect.

Who are Nordlux

Ever since Nordlux was established in 1977, it has been our goal to deliver quality lighting at attractive prices.

We're passionate about inspiring people to make the most of lighting. The Danish tradition and passion for great lighting combined with world class technology enables us to deliver a wide range of products with a superior combination of lasting quality, great design and user-friendly functionality - at competitive prices.

Nordlux's products light up the dark in more than 50 countries and are sold by more than 5000 dealers worldwide.

Nordlux Group consists of three brands:
Nordlux, Design For The People and Energetic.

Nordlux is attractive value-for-money bulbs and luminaires, while Design For The People focuses on award-winning Danish design products. Energetic provides LED products (mostly bulbs) with the newest technology.

Sustainability report

At Nordlux, light is where it all begins. But the mark our light leaves on Life and Earth defines how we think about design, durability and responsibility. This sustainability report marks an important milestone on our journey, bringing greater transparency to how we work, the choices we make, and the progress we aim to achieve in the years ahead.

This report is Nordlux Group's first sustainability report, highlighting our initiatives within sustainability and how we work to create value for the lives we impact. The report is structured around three perspectives: Earth, Light & Life.

The report covers all companies within Nordlux Group, as outlined in the group structure diagram presented later in this report. Any key figures presented cover the financial year 2025, from 1 January to 31 December. We recognise that building a more sustainable company requires dedication from everyone connected to Nordlux - from owners, board members, management to employees, suppliers, and customers. For this reason, we work systematically to establish standards and processes that support continuous improvement across our value chain.

We see sustainability as a continuous journey - one where we learn, improve, and take responsibility step by step. Sustainability has been a central focus for us for many years, but this report allows us to further clarify our efforts and provide a more structured foundation for the improvements and strategic initiatives ahead. This report is part of our commitment to being transparent about the progress we make and the areas we are still working on.
